

MEDALLION INSTALLATION GUIDE

Ceiling Medallion

1

Apply polyurethane adhesive on the back side of the medallion staying approximately 1" away from edge. (polyurethane adhesive not included)

2

If required, standard or trim head screws can be used to secure medallion until adhesive sets. Screw heads should be recessed. (Screws not included)

3

If any adhesive runs out during steps 1 or 2, use a wet cloth immediately to remove the excess.

The medallion is now installed!

4

When you install the lighting fixture, you may need to replace the threaded nipple that comes with the lighting fixture, with the longer threaded nipple included with the ceiling medallion.
